CAREER OBJECTIVE

Detail-oriented software development professional and team leader with history of proposing enhancements that improve designs. Highly effective at analyzing existing systems to discover issues and developing creative solutions that satisfy business and customer needs.

SKILLS

JAVA, JAVASCRIPT, TYPESCRIPT, SPRINGBOOT, ANGULAR 2.0+, NODEJs, PIVOTAL CLOUD FOUNDRY, AMAZON WEB SERVICES, GKE, DEVOPS, AGILE, GIT, CONCOURSE, APIGEE, IBM WEBSERVICES, DATABASES(DB2,MYSQL,ORACLE), KUBERNETES, DOCKER, ANTICIPATING & PROBLEM SOLVING, COMMUNICATION, RELATIONSHIP-BUILDING, DEALING WITH PRESSURE, PRIORITIZE & MANAGE TIME

EXPERIENCE

September 2023 - Current

Sr Engineer Application Development and Maintenance

- Led cross-functional engineering teams in the design, deployment, and governance of cloud-native platforms, including Kubernetes (GKE).
- Architect designs of new implementations within current stack (Springboot and Angular)
- Directed day-to-day technical operations, proactively removing blockers, managing sprint priorities, and ensuring timely delivery of high-impact features.
- Mentored and coached junior engineers, fostering a culture of continuous learning, innovation, and accountability across geographically distributed teams.
- Championed DevSecOps practices, CI/CD pipelines (Concourse)
- Collaborated with Security, Architecture, and Application teams to embed security into the SDLC and ensure compliance.
- Defined and executed platform roadmaps, aligning engineering efforts with strategic business goals and translating high-level objectives into actionable technical plans.
- Managed vendor relationships and platform investments, evaluating emerging technologies.
- Led incident response and root cause analysis, driving continuous improvement in platform reliability, performance, and disaster recovery strategies.

- Established engineering best practices, including code quality standards, documentation protocols, and architectural guidelines for scalable, cloud-native systems.
- Promoted cross-functional alignment, serving as a liaison between engineering and business stakeholders to ensure transparency, shared goals, and delivery excellence.

December 2021 - September 2023

Application Development Manager (Accenture)

- Handling \$5M portfolio delivery
- Evaluated, identified and developed software solutions
- Planning, tracking and scheduling software deliverables
- Locate and direct solutions for critical challenges
- Evaluated proposals to assess project feasibility and requirements
- Tech Lead for software development projects
- Document and record every aspect of an application or software
- Train and oversee the activities of the members of the development team
- Develop good working relationships with other employees, such as Product Managers, Programmers
- Assigned and reviewed work of systems analysts, programmers and other computer-related workers
- Developed full stack systems in Angular, SpringBoot. Also developed on DevOps and Cloud Technologies
- Recruited, hired, trained and supervised staff or participated in staffing decisions
- Planned to plan and coordinate project activity
- Demonstrated ability to manage multiple tasks while remaining adaptable and flexible
- Defined problems, collected data, established facts and validated conclusions.
- Prepared reports or correspondence concerning project specifications, activities or status.

December 2019 - November 2021

Application Development Associate Manager (Accenture)

US

- Design and Development of Restful Spring Boot Services
- Implemented spring cloud services like Hystrix, Eureka,
- Jenkins / Concourse is used as a pipeline
- Design and Developed Angular JS 2.0 application and integrated it with Restful Spring Boot Apps

- Implemented SSO with Okta, Angular SPA and PCF SSO Service
- Analyzed performance data to identify areas of improvement.
- Suggested changes to standard operational and working practices, providing leadership needed to develop and implement continuous improvements.
- Conducted performance reviews to measure employee growth and skills.
- Delegated tasks to team members according to project requirements and employee strengths.
- Developed and utilized team building exercises to promote workplace synergy and productivity.
- Implemented incentive programs to motivate team members.
- Collaborated with other departments to ensure successful completion of projects.

December 2016 - November 2019

Team Lead (Accenture)

US

- Lead development team, and managed delivery of a module.
- Prepared low-level design document
- Developed Microservices in SpringBoot.
- Designing and Delivering complex modules in IBM Websphere Framework
- Developed and utilized team building exercises to promote workplace synergy and productivity.

December 2013 - November 2016

Application Development Senior Analyst (Accenture)

- Prepared low-level design document
- Creating restful microservices in Spring Boot.
- Using PCF as PaaS to deploy Spring Boot/Angular apps.
- Creating front-end on Angular 2.0 framework.
- Maintains code and documents on "GIT"/"SVN"
- Created the JUNIT test cases for the application
- Creating test cases for the assigned modules
- Have hands-on experience in developing REST Services and SOAP Services.
- I have expertise on UI(CSS, JS,HTML)
- Modified existing software to correct errors, adapt to new hardware or upgrade interfaces.

- Wrote well-designed, testable code.

November 2011 - November 2013

Application Development Analyst (Accenture)

- Worked on the design and developments of JSR 286 PORTLETS (all the portlets like User Registration, Login, Services, feedback, Grievances, etc.)
- Development of portlets
- Development on Struts2 framework
- Worked on the themes and layouts of portal
- Involved in all the Build and deployment on Staging and production environment using linux.
- Handled all the applications for development and support as a sole resource.
- Have designed tools for the Project for better productivity like Birt Tool which is used for reporting.

July 2011 - October 2011

Application Development Associate (Accenture)

- The role was to support the application and support the related issue.
- Wrote SQL statements for querying database and extracting data.
- Developed technical handbooks to represent design and code of new applications.

EDUCATION

May 2011

Bachelor of Science | Information Technology

Jaypee University of Information Technology, Solan, Himachal Pradesh

75%
